Thrusday, 17th January

The initial day had no formal discussion but a time was selected to meet.

Friday, 18th January

General discussion on how to conduct a general survey among IIITG students community took place among the members. The following points were highlighted during the meeting:

- Start with peers of same batch.

- Extend discussion with students who were/are a part of an institution where *such a system* previously existed or is currently in existence.

The meeting concluded with the above objective but was no interviews were conducted on this day.

Saturday, 19th January

Four interviews on general perspective on the necessity of a token based mess management was done. All results were *yes* in their answers. Additionally, three students who had previously experienced an incorporated mess management system during their internship period stay were asked about the experiences of the same. All reports are submitted separately and were not discussed in the meeting. The meeting concluded with a necessity to meet the mess manager in the following day.

Sunday, 20th January

This meeting highlighted the following topics:

- The meeting with the mess manager could not take place. An additional day extension to the same task had been approved.

- The report on the interviews was prepared and ready to be submitted.

- An emphasis was put on putting an online Google Hangout Group for the same task was suggested.

The meeting concluded with next convergence time taken to be on Monday, 21th January, during the lab session.
